

Riyan Amanda

Fullstack Software Engineer (Java / Go / React)

ryant.n92@gmail.com | [linkedin](#) | [github](#)

Palembang, Indonesia (**Open to relocation / remote**)

Fullstack Software Engineer with 5+ years of experience building production web applications, with recent focus on backend development using Java (Spring Boot) and working knowledge of Go, along with frontend development experience using React.

Experienced in designing REST APIs, implementing modular architectures, and integrating frontend and backend systems to deliver reliable and maintainable applications. Strong foundation in monolithic systems (Laravel) and evolving towards more scalable, decoupled architectures.

Focused on building end-to-end solutions that are scalable, maintainable, and aligned with real-world business needs.

CORE SKILLS

Backend

- Java (Spring Boot), Go, Laravel

Architecture

- REST API Design, Modular Architecture, Clean Architecture

Database

- PostgreSQL, MySQL, Redis

DevOps

- Docker, CI/CD (GitHub Actions), Linux

Frontend

- React, Vue.js

PROFESSIONAL EXPERIENCE

Fullstack Software Engineer

Ernaldi Bahar Hospital – Contract

Feb 2023 – Present

- Supported and maintained existing systems, including reporting and internal tools
- Assisted in extending system functionality and handling production issues
- Performed monitoring, troubleshooting, and deployment support
- Contributed to improving system reliability in production environment

Senior Programmer

PT. Lingkaran Sistem Intelektual — Full-time

Apr 2020 – Dec 2022

- Developed backend services for business applications and digital platforms
- Implemented CI/CD pipelines using GitHub Actions, improving deployment reliability
- Mentored junior developers and improved engineering practices
- Contributed to system design decisions and technology evaluation

Programmer

Universitas Bina Darma — Contract

Apr 2022 – Dec 2022

- Developed web applications with focus on backend logic and API integration
- Managed deployments across development and production environments
- Assisted in feature development and bug fixing

FEATURED PROJECTS

SPACEPRO — Fullstack Developer

PT. Trifilosofi Lifestyle Indonesia

Oct 2025 – Mar 2026

Tech: Java (Spring Boot), React, PostgreSQL, Redis, Docker, CI/CD

- Designed and implemented backend services using Spring Boot to support production workflows and daily operations
- Developed Admin Panel using React for internal system management
- Built REST APIs to support business workflows and operational processes
- Applied modular architecture to improve maintainability and reduce code complexity
- Implemented caching using Redis to improve response time for frequently accessed data
- Built CI/CD pipeline and containerized deployment using Docker, reducing manual deployment effort

SIMPLE PLAN – Fullstack Developer

PT. Pertamina Patra Niaga

Oct 2023 - Apr 2024

Tech: Laravel, MySQL, CI/CD (GitHub Actions)

- Developed backend system for multi-region verification and tracking processes
- Designed relational database schema to ensure data consistency and efficient querying
- Built reporting and monitoring features for operational visibility
- Implemented CI/CD pipeline using GitHub Actions

Lingkaran ID – Fullstack Developer

PT. Lingkaran Sistem Intelektual

Apr 2020 - Dec 2022

Tech: Laravel, MySQL, CI/CD (GitHub Actions)

- Contributed to Lingkaran.id, a digital news portal combining online publishing with analytics insight features
- Developed backend modules, frontend features, and content workflows for production usage
- Supported maintenance and continuous platform improvements

Live Fuel Track — Fullstack Developer

PT. Trifilosofi Utility Indonesia

Mar 2026 – May 2026

Tech: React, TypeScript, TanStack Query, Vite, Go (Backend Support)

- Developed and maintained the core frontend application using React & TypeScript, implementing a modular component architecture that improved code reusability

- Optimized data fetching, caching, and state management with TanStack Query, reducing redundant API calls and enhancing UI responsiveness
- Integrated frontend modules with backend REST APIs, ensuring robust error handling, consistent data synchronization, and seamless user flows
- Provided targeted backend support using Go, diagnosing and resolving minor service bugs while maintaining alignment with the existing system architecture

EDUCATION

Master of Computer Science

Universitas Bina Darma

2018 – 2020

GPA: 3.38 / 4.00

Bachelor of Information Systems

Universitas Multi Data Palembang

2010 – 2017

GPA: 2.80 / 4.00

CERTIFICATION & PUBLICATION

CITEI 2020 – Universitas Ahmad Dahlan

Published paper in an international journal indexed by Scopus
